Researchers of the Month

NB Health Researcher of the Month

HEALTH RESEARCH LEADS TO BETTER HEALTHCARE

During a given year, your Health Research Foundation celebrates individual or groups of health researchers for their achievements in health research, applied medicine and innovation.

To date we have celebrated new, established, student, clinician investigators and research teams at the annual New Brunswick Health Research conference Gala of Excellence.

2020 Researcher of the Month Program: NB Health Research Teams

The 2020 program is aimed at promoting collaboration in health research and at recognizing excellence in research conducted by research teams in all areas and disciplines that fall under health research.

For this program, a research team must be comprised of three or more individuals with at least one team member located within New Brunswick. The research team must also be a collaboration. A collaboration is defined as a research team including two or more investigators from different departments, institutions or agencies.

Once a month, from January 2020 to September 2020, at least one research team will be selected to be highlighted by NBHRF.

In order to be considered, the team must submit the form found here: <https://www.nbhrf.com/en/webform/application-soumission>

Monthly winners will be selected by NBHRF and announced on the 15th day of the month. Nominee's will automatically be considered in future months of 2020. Winners will be showcased in an online Huddle article, on the NBHRF website, in the monthly NBHRF eNewsletter and at the Gala of Excellence in October 2020 where the NB Health Research Team of the Year will be announced.

View our featured health researchers by selecting the current year or past year nominees.
